

22 PYTHON OPEN SOURCE VISUALIZATION LIBRARIES

1. [**altair**](#) - Declarative statistical visualizations, based on Vega-Lite.
2. [**bokeh**](#) - Interactive Web Plotting for Python.
3. [**Chartify**](#) - Bokeh wrapper that makes it easy for data scientists to create charts.
4. [**diagram**](#) - Text mode diagrams using UTF-8 characters
5. [**ggplot**](#) - plotting system based on R's ggplot2.
6. [**glumpy**](#) - OpenGL scientific visualizations library.
7. [**holoviews**](#) - Complex and declarative visualizations from annotated data.
8. [**ipychart**](#) - The power of Chart.js in Jupyter Notebook.
9. [**mayai**](#) - interactive scientific data visualization and 3D plotting in Python.
10. [**matplotlib**](#) - 2D plotting library.
11. [**missingno**](#) - provides flexible toolset of data-visualization utilities that allows quick visual summary of the completeness of your dataset, based on matplotlib.
12. [**plotly**](#) - Interactive web-based visualization built on top of plotly.js
13. [**PyQtGraph**](#) - Interactive and realtime 2D/3D/Image plotting and science/engineering widgets.

14. **PyVista** - 3D plotting and mesh analysis through a streamlined interface for the Visualization Toolkit (VTK)
15. **seaborn** - A library for making attractive and informative statistical graphics.
16. **toyplot** - The kid-sized plotting toolkit for Python with grownup-sized goals.
17. **three.py** - Easy to use 3D library based on PyOpenGL.
Inspired by Three.js.
18. **veusz** - Python multiplatform GUI plotting tool and graphing library
19. **VisPy** - High-performance scientific visualization based on OpenGL.
20. **vtk** - 3D computer graphics, image processing, and visualization that includes a Python interface.
21. **pandas-profiling** - generates statistical analytic reports with visualization for quick data analysis.
22. **pyecharts** - Python binding for Echarts library.
